## ➤ QUICK START GUIDE A ◀

### Instructions for Fast Simple Playback of a Single Media File on a Single Monitor With NO Router/Internet Connection

(Media file will loop automatically)

For media file(s) on a single monitor WITH a Router/Internet Connection to Access more Pro-Player Plus operating features, please see QUICK START GUIDE B. For more detailed instructions, please visit [www.ProPlayerPlus.com](http://www.ProPlayerPlus.com) to download the latest manual.

---

#### STEP 1: Equipment Checklist

##### Included in Box:

- |   |   |
|---|---|
| <input checked="" type="checkbox"/> (1) Pro-Player Plus 4K System | <input checked="" type="checkbox"/> (1) USA Standard 120V Power Cable |
| <input checked="" type="checkbox"/> (1) 19V Power Supply          | <input checked="" type="checkbox"/> Quick Start Guide(s)              |

##### Customer to Provide:

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> (1) Monitor | <input checked="" type="checkbox"/> (1) HDMI Cable |
|---|--|

---

#### STEP 2: Make System Connections - Inputs and Outputs

Switch power OFF on each piece of equipment or device prior to making connections.

NOTE: You may wish to mount the PP+ to the rear of the monitor (e.g., with Velcro)

---

#### STEP 3: Turn On Power to all Equipment / Devices

NOTE: Wait until all devices/equipment have finished starting up before proceeding.

---

#### STEP 4: To Load and Playback a Single Media File

Supported File Types: .mp4 .wmv .mpeg .mpg .mkv .mov

Supported File Resolution: 480p - 4K

- Place your media file on the *root directory* of a USB thumb drive
  - Insert USB thumb drive into the PP+ Player
  - The Player will take approx 30 seconds to recognize the thumb drive, then your file will automatically load onto the Player
  - When the file is finished loading, it will automatically begin playing in a looping fashion (auto replays) until PP+ is powered OFF
  - Once you turn PP+ Power back ON, the file will begin to play again automatically
-

## ➤ QUICK START GUIDE B ◀ Playback Instructions for Media File(s) on a Single Monitor

### WITH Router/Internet Connection to Access PP+ Operating Features

For more detailed instructions, please visit [www.ProPlayerPlus.com](http://www.ProPlayerPlus.com) to download the latest manual.

#### STEP 1: Equipment Checklist

##### Included in Box:

- (1) Pro-Player Plus 4K System
- (1) USA Standard 120V Power Cable
- (1) 19V Power Supply
- Quick Start Guide(s)

##### Customer to Provide:

- (1) Monitor
- (1) HDMI Cable
- (2) Ethernet/Cat5 Cables
- (1) Wi-Fi Router
- Laptop or Wi-Fi Enabled Smart Device (Cell Phone or Tablet)

#### STEP 2: Make System and Router Connections - Inputs and Outputs

Switch power OFF on each piece of equipment or device prior to making connections.

NOTE: You may wish to mount the PP+ to the rear of the monitor (e.g., with Velcro)

NOTE: If you're just using PP+ with a single monitor and USB Copy feature (which will automatically loop your media file), no router connection is needed (See Quick Start Guide A)

#### STEP 3: Turn On Power to all Equipment / Devices

NOTE: Wait until all devices/equipment have finished starting up before proceeding.

#### STEP 4: To Load and Playback Media Files

Supported File Types: .mp4 .wmv .mpeg .mpg .mkv .mov

Supported File Resolution: 480p - 4K

- Place your media files on the root directory of a USB thumb drive
- Insert USB thumb drive into the PP+ Player
- The Player will take approx 30 seconds to recognize the thumb drive, then your files will automatically load onto the Player
- When the files are finished loading, the last file will automatically begin playing in a looping fashion (auto replays)

### STEP 5: Log on to PP+ Player through Network to Access Web-Based Interface to select which file to play, create a playlist, upload additional files or delete a file

- Connect the PP+ Master Player and your laptop or smart device to the same network
- Set your laptop or smart device to the 192.168.168.75 network on any address *other than* 192.168.168.1
- Open your browser and enter in 192.168.168.1
- Log in as: user/1234 (suitable for end users) (To log in as an administrator, which is for technical personnel and advanced users, please consult user manual)

### STEP 6: Access PP+ Features through Network

When the web-based interface opens, press

**Media Manager**. From here, you can:

Play file(s) once

Loop file(s) (continuously play)

Upload & download file(s)

Delete file(s)

Display number of file(s)

Indicates DMX file(s)

Check disc space (green storage bar across top of media file list turns yellow at 75% full and red at 95% full)

**Name** Sort alphabetically (click column heading)

Web Interface (User Log-In) Menu ↑

**Tabs** Create Scene, Playlist, Slideshow ...

Media Manager Menu ↓

For more detailed information, access user manual via the network or download it at ProPlayerPlus.com.
